Processing tips

The **Ampacoll® Sillskin butyl tape** can be used for a variety of applications. It serves as a means of covering parapets during construction phases and can also be used as a permanent underlayment for windowsills.

Large seams can also be conveniently covered with the tape. The tape's high quality butyl material ensures excellent elastic properties. This enables you to accurately cover tricky locations and surfaces such

as corners. Please refer to our user instructions for details on the use of the product.

Note the application guidelines and other system products in our adhesive matrix.
